DETAILED ACTION

Specification

1. The incorporation of essential material in the specification by reference to a foreign application or patent, or to a publication is improper. Applicant is required to amend the disclosure to include the material incorporated by reference. The amendment must be accompanied by an affidavit or declaration executed by the applicant, or a practitioner representing the applicant, stating that the amendatory material consists of the same material incorporated by reference in the referencing application. See *In re Hawkins*, 486 F.2d 569, 179 USPQ 157 (CCPA 1973); *In re Hawkins*, 486 F.2d 579, 179 USPQ 163 (CCPA 1973); and *In re Hawkins*, 486 F.2d 577, 179 USPQ 167 (CCPA 1973).
2. The disclosure is objected to under 37 CFR 1.71, as being so incomprehensible as to preclude a reasonable search of the prior art by the examiner. For example, the following items are not understood: pages 3 and 4 of specification refers back to EP 0 387 520 for various features. It is not understood how the preset invention is different than conventional measuring device. Further more page 7 refers to EP 0 082 441, which is not understood where the art is incorporated by reference or not. Pages 9 ,11, 12, and 13, of specification refers to EP 0 387 520 for two scanning units and signal generation, however it is not understood where the art is incorporated by reference or not. Additionally, pages 14 and 15 refers to EP 0 082 441, it is not understood.

Applicant is required to submit an amendment, which clarifies the disclosure so that the examiner may make a proper comparison of the invention with the prior art.

Applicant should be careful not to introduce any new matter into the disclosure (i.e., matter which is not supported by the disclosure as originally filed).

A shortened statutory period for reply to this action is set to expire ONE MONTH or THIRTY DAYS, whichever is longer, from the mailing date of this letter.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

4. Claims 10-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Ernst (4,951,399).

7. Regarding to claimed invention, Ernst teaches a measuring device for measuring position indication and the detection of guidance errors comprising a graduation (Ta) in a graduation plane (TFa) of the graduation carrier (TTa) which is connected to one of the objects as to claimed position measuring graduation arranged in a position measurement direction; the claimed first and second guidance error measuring graduation arranged perpendicularly with respect to position measurement graduation,

Ernst teaches guide surface perpendicular to the graduation surface of the graduation carrier, and comprising a guide coupling perpendicular to the direction of measurement to connect the guide elements. Ernst further discloses position indication scanning unit movable with respect to the scale such as scanning unit (A), see at least abstract and col. 2, lines 36-63. With regard to claimed elements such as scanning unit comprises light source that emits beams of light, a retro-reflection component and a detector element, Ernst discloses that in order to scan the graduation TTa, the scanning unit comprises arrangement that is known to those skilled in the art, a scanning plate AP with a scanning graduation, a lighting unit and at least one photoelement, see col. 3, lines 29-33.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kamini S Shah whose telephone number is 703-305-9590. The examiner can normally be reached on IFP.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John H Hiltun can be reached on 703-308-0719. The fax phone numbers for the organization where this application or proceeding is assigned are 703-308-7722 for regular communications and 703-308-7722 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0956.
